Looked Like Chicken Pox or Blood Poison-People Afraid to Go Near Her -Two Babies Suffer Terribly With Milk Crust Which Maturated.

ALL COMPLETELY CURED BY CUTICURA

"Some time ago my daughter, aged 14, began to break out on her face with small pimples and I told her to get the Cuticura Remedies and take them, but she used some stuff called D—and in about three weeks her face was a sight. It looked some like chicker pox and at last like blood poison, so that every one who saw her was almost afraid to go near her. Then I sent for a complete set of the Cuticura Remedies and now she has not had a pimple for two months. I knew that eighteen years ago, I had a little girl who had what the doctor called milk crust on her head. This spread until one ear was covered. She was then six months old and grew worse until I used all three of the Cuticura Remedies, which cured her. I have a little boy, now two years old, who was taken the same way. When five days old his head began to raise up in water blisters, then turned red and then a yellow matter formed under the blisters. It dried up and looked like a big patch of dirt, then it scaled off, broke out again and spread nearly all over his head. The same kinds of sores formed in the bends of his arms and legs. At first I had a physician who treated him and said he would outgrow it, but when he was two weeks old I began to use the Cuticura Remedies, and when three months old he was well, and he now has a fine skin, as clear as crystal. I always use Cuticura Soap when I wash him. Mrs. J. A. Jacobs, Berlin, N. J., June 19, July 11, and Oct. 20, 1906.
